ASBESTOS CEMENT

DELCOTE®

Architectural Coating

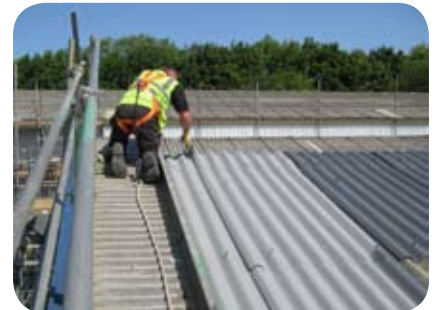

A single component, silicone coating for the encapsulation, repair and weatherproofing of asbestos and non-asbestos fibre cement roofing.

DELCOTE® Prescribed for NHS

An old leaking asbestos roof looks a mess, causes internal operating problems and gives sleepless nights worrying about potentially dangerous asbestos fibre sheets. Corrosion of the fixing bolts leads to further movement and leakage. This was the scenario facing the NHS record keeping facility situated in Norwich.

The answer was found by turning to the Delcote silicone roof coating system. Surveyors Edgeworth Street of Solihull provided a detailed specification that included a thorough, safe clean down followed by treatment of all corroded fixing bolts with Seamsil 400. Next all horizontal lap joints were sealed with Seamsil sealant and Basecoat. To finish the operation two coats of Delcote were applied to completely encapsulate all external asbestos roof sheets to provide a sealed and watertight roof skin.

- PROJECT:** Asbestos Cement Sheet Encapsulation
CLIENT: NHS
CONTRACTOR: I.C. Projects, Walsall
Tel: 01543 370892
MATERIALS: **GIROMAX TECHNOLOGY LTD.**
Tel: +44 (0) 1455 558969
SPECIFICATION: Delcote Asbestos Cement Roof Sheets
SIZE: 3000 m²
